20260417 - Repubbliche Baltiche

Camper trip through Switzerland, Austria, Germany, Czech Republic, Poland to see what's in Lithuania, Latvia, Estonia.

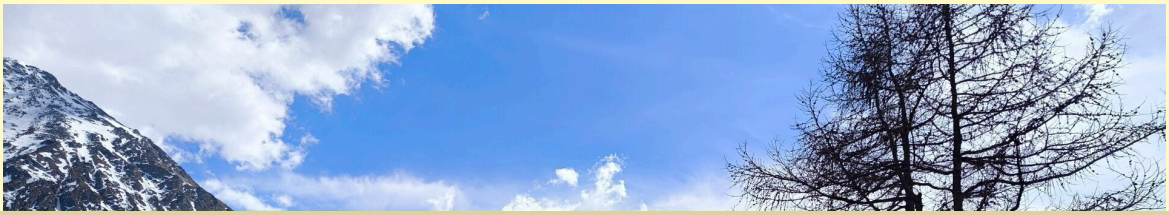

April 17, Friday Departure (Parlasco - Fernpass(A))

Departure 12:00 PM km 146.720

This time the departure is a bit difficult, I always feel like I have little to load but it's never like that, in fact today all the bags wouldn't fit in the car, also because the little dogs absolutely don't get out for fear that we'll leave them here... We also have a small hiccup because the camper's roof is very full of water and so water is coming into the camper from the front hatch. Umberto has the good idea to move the camper to a downhill spot and we empty the roof, it works, it had never happened before, who knows.

We go as usual to Polvara's to leave Carmen for her inspection, then we have the levels of René checked and discover there's almost no oil left, Roberto puts in 4.5 kg of oil. We could also eat here but we prefer to leave to consider ourselves already on our way and so we head to Novate Mezzola, where there is a beautiful paid camper area on the lake shore where we stop to eat and refill water.

We leave quite early and at 3:00 PM we cross the Maloja Pass, which we had never done in a camper. The pass is a bit tough because it's very steep but the road is very wide, unlike the one to the Spluga Pass.
