Chapter 3: the JukeBox

JukeBox:

the JukeBox allows you to play the music of the articles, individually or in sequence, and to listen to existing playlists.

If the service has been opened as a registered user on the platform, you can create your own playlists and save them.

Furthermore, as a registered user, you can also play the music contained in the VittRos Share (VRS) service.

The created playlists are then available to everyone.
